A new generation diesel engine.

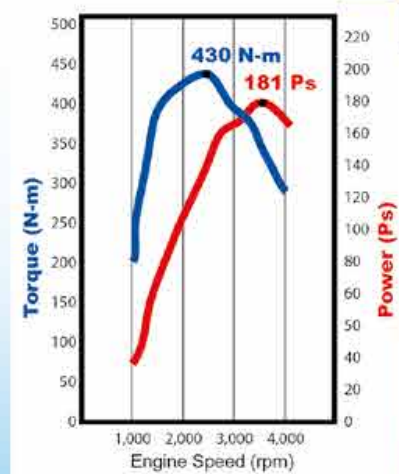

# STRADA GLS 2WD

4-cylinder, DOHC, 16 valves 2.4L Clean Diesel engine with Mitsubishi Innovative Valve timing Electronic Control (MIVEC) system

Compared to traditional diesel engines, the new 4N15 engine boasts of a low compression ratio, thus reducing fuel consumption, smoke and nitrous oxide emissions as well as maximizing the output of the Variable Geometry Turbo (VGT). It also uses an aluminum cylinder block, making it significantly lighter. This translates to better fuel economy without sacrificing engine output.

As a result, the power and torque output of the all-new Clean Diesel engine with MIVEC is rated at 181 Ps / 3,500 rpm and 430 N-m / 2,500 rpm.

Dual SRS Airbags

**RISE Body Construction**  
 (Reinforced Impact Safety Evolution)

The comprehensive safety system of the Strada offers all the occupants greatly improved all-around collision protection. Mitsubishi's exclusive RISE body construction incorporates front and rear crumple zones with reinforced beams to absorb collision force and direct it away from the vehicle's interior. The engine and drive components also absorb energy, preventing further damage from reaching the cabin.

Anti-lock Braking System (ABS)

Electronic Brake-force Distribution (EBD)
